Section III. Assessment and qualification criteria

This Section supplements the Instructions to Bidders (ITB). It includes the criteria that the Buyer must use to evaluate a bid and determine whether a Bidder meets the qualifications required under Articles 34 and 36 of ITB. The Buyer will not use any criteria other than those indicated in this Section III.

Content

1. Assessment of preference (ITB 33): Not applicable
2. Assessment of economic factors (ITB 34): Applicable
3. Multiple Market Assessment (ITB 34): Applicable
4. A posteriori qualification (ITB 36): Applicable
1. Assessment of preference (ITB clause 33)

(Not Applicable: N/A)

If the BDS provide for it, the Purchaser will grant in the comparison of the evaluated offers a margin of preference to the supplies manufactured or assembled in the country of the Purchaser, in accordance with the procedure below.

The Buyer will classify the offers in one of the three groups below:

a) **Group A**: offers proposing supplies manufactured in the Institution's country, for which: (i) the cost of labor, raw materials and components originating in the Institution's country represent more than thirty (30) percent of the EXW price of the supplies, and (ii) the establishment in which these supplies will be manufactured or assembled, manufactures or assembles identical supplies at least since the date of the submission of tenders.

b) **Group B**: all other offers proposing supplies originating in the country of the Institution.

vs) **Group C**: offers proposing supplies manufactured or assembled outside the Institution's country, which have been or will be imported.

To facilitate this classification by the Purchaser, the Bidder will complete the appropriate version of the Price Schedule included in the Bidding Document. It is understood, however, that if the Bidder makes a mistake in the version and fills out another form, its offer will not be rejected but will simply be reclassified by the Purchaser in the appropriate group.

The Buyer will first examine the bids to verify into which group the bidders have classified their bids when preparing their bids and Price Schedules. He will confirm or modify this classification if necessary.

All evaluated offers in each group will then be compared against each other, to determine which evaluated offer is the lowest in each group. The lowest evaluated bid from each group will then be compared with the lowest evaluated bid from the other groups. If, from this comparison, it emerges that an offer from Groups A or B is the lowest evaluated offer, the Tenderer who submitted it will be awarded the contract.

If, as a result of the above comparison, the lowest evaluated offer is in Group C, all offers in Group C will be compared again with the lowest evaluated offer in Group A, after has added to the evaluated price of the supplies offered in each of the offers of Group C, and for the sole purpose of this additional comparison, an amount of fifteen (15) percent of the CIP price (place of destination) of the products and goods to be imported or already imported. All prices will take into account unconditional discounts and corrected for arithmetic errors. If it is the offer of group A which is less expensive, it is retained as the winner of the contract. Otherwise, the lower evaluated offer from Group C will be selected in accordance with the above paragraph.
3. Assessment and qualification criteria

2. Assessment of economic factors (ITB clause 34)

The evaluation of an offer by the Purchaser may take into account, in addition to the price of the offer submitted in application of the provisions of article 14.8 of the IS, one or more of the following factors, as indicated: in IS 36.3 (d), and as specified in the Data Sheet with reference to IS 34.6, using the methods and criteria described in 1.2 below:

a) Delivery schedule (version of Incoterms specified in Data Sheet): Applicable

The Supplies covered by this Invitation to Tender must be delivered within an acceptable period of time (i.e. between and including an initial date and an end date) specified in Section VII - Schedule of delivery. No bonus will be awarded for early delivery; and offers offering delivery beyond this period will be considered non-compliant. Within this acceptable period of time, an adjustment as stipulated in Data Sheet -34.6, will be added to the prices of offers providing for delivery on a date included in the period specified in the Delivery Schedule. This adjustment will be made for evaluation purposes only.

b) Variants to the Settlement Schedule: N/A

Bidders will indicate the prices of their bids on the basis of the Settlement Schedule appearing in CCAP. Bids will be evaluated on this basis. Bidders are, however, allowed to submit a variant to the Settlement Schedule and to indicate the price reduction they would accept for that variant. The Purchaser may consider the alternative to the Settlement Schedule and the price reduction proposed by the successful Bidder on the basis of the Settlement Schedule appearing in the CCAP.

c) Cost of spare parts, mandatory spare parts, and after-sales service: Applicable

The list and quantities of major assemblies and spare parts, which are likely to be required during the initial period of operation of the supplies specified in Data Sheet with reference to ITB article 16.4, is provided in the list of Supplies. Their total cost resulting from the application of the unit prices indicated in the offer, will be added to the offer price for evaluation purposes.

d) Availability of spare parts and after-sales services in Buyer's country, for the equipment offered in the bid: N/A

The cost to the Purchaser of setting up minimum facilities for after-sales service and for the storage of spare parts, described in Data Sheet -34.6, will, if stated separately, be added to the offer price, for evaluation purposes.

e) Operation and maintenance costs: N/A

The operation and maintenance costs of the Supplies which are the subject of the Invitation to Tender will be added to the price of the offer, for evaluation purposes only, and if specified in BDS 34.6. The adjustment will be made in accordance with the methodology specified in clause 34.6.

f) Performance and yield of supplies: N/A

The equipment offered must have the minimum performance specified in the Technical Specifications to be considered in conformity with the provisions of the Bidding Document. The evaluation will take into account the additional cost due to the difference in performance of the
equipment proposed in the tender compared to the required performance; the price offered will be adjusted according to the method appearing in Data Sheet -34.6.

g) Additional specific criteria: N/A

Any other specific criteria, as well as the appropriate method for its application to the assessment, should be detailed in BDS - 34.6, where applicable.

3. Assessment of multiple contracts (ITB clause 34.4)

(Not Applicable)

The Purchaser will award several contracts to the Bidder who offers the lowest evaluated combination of bids (one contract per bid) and which satisfies the conditions for ex post qualification (in accordance with this Section III, clause 36.1 of IS, Verification of Qualifications to posteriori).

To this end, the Purchaser:

a) Evaluate only those lots and contracts offering at least the percentages of items per lot and quantity per item stipulated in ITB article 14.8; and

b) will take into account:

   i) The lowest bid;

4. Alternative Offers (ITB clause 13.1): N/A
5. Qualification conditions a posteriori (clause 36 of ITB)
